

Medencrypt Adds Transcription Edge To Their Mtso Affiliates

By MedEncrypt, LLC

Dated: Dec 09, 2010

Nacogdoches, Texas November 1, 2010 – Medencrypt announces Transcription Edge as an addition to their list of MTSO affiliates.

Transcription Edge was in search of a web-based dictation and transcription application. The requirements were simple, yet with the variety of services they had to offer, MedEncrypt exceeded all expectations. Their applications provide MTSOs, MT Companies, Health Care, and Legal Facilities the ability to efficiently manage the dictation and transcription process.

Transcription Edge offers three beneficial transcription service options.

- Onshore Services:

Have both your transcription and QA work done from our qualified trained staff here in the United States.

- Offshore Services:

Have both your transcription and QA work done from our qualified trained staff in India for a cheaper cost with the same quality and excellence as our On-shore services.

- Combination Services:

Have your transcription work done from our qualified trained staff in India and the QA work from our trained staff here in the United States.

This company also provides call-in dictation services and offshore bridging solutions. Their offshore bridging solutions is the perfect solution for U.S. domestic companies who work with companies offshore that experience problems with download and upload speeds to send files to between the locations.

“We are proud to add Transcription Edge to our list of MTSO clients. It is great for us to be affiliated with a local transcription service company in our area.” – Michelle Liwanag, MedEncrypt Manager – Operations and Sales.
